the anatomy, broadening our collective understanding of the anatomy, methods/techniques, pharmacology, and outcomes pertaining to lower extremity nerve blocks. More importantly, these trials have also highlighted areas in dire need of further investigation. The authors are convinced that, with the (future) third iteration of this review article, multiple questions raised in the preceding pages will have found answers and multiple new queries will see the light of day.

Acknowledgements The first author would like to thank Dr. Daniela Bravo (University of Chile) for her invaluable assistance with the literature search pertaining to the Outcomes section.

Competing interests None declared.
